DISCOVER INTELLIGENTLY DESIGNED KITCHENS
FEATURING A SUPERIOR DESIGN

NEW IN 2024

A kitchen with an impressive working height of 105 cm and a solid glued body with a useful capacity of 86 cm. The high-pressure laminate (HPL) front guarantees durability and quality for years to come. Notice the aluminium front edge detail. The minimalist shape with no visible handles adds a touch of modernity and elegance.

A kitchen design that radiates natural earth tones. The veneered front with vertical corrugation, an edge handle, and a 20 mm thick quartz conglomerate worktop is the true quintessence of luxury and elegance. An eye-catching and functional roller shutter cabinet, and a high furniture wall with no visible handles. All of this is complemented by a tasteful lamp above the kitchen island, creating an atmosphere of exceptional elegance and intimacy.

Join us in discovering new, previously unknown designs made possible thanks to electrifying combinations of structures. A juxtaposition of four different fronts in one kitchen – woodgrain laminate, matte lacquer in earthy tones, matte lacquer in burgundy, and a fluted wood front. This kitchen design offers a work area and lockable wall sections, which are concealed when the accordion fronts are closed.

NEW IN 2024

Prominent front design with herringbone pattern. A kitchen that makes you feel closer to nature thanks to the natural, high-quality materials used. The kitchen bar is in natural oak, and the main worktop is 30 mm sintered ceramic. The design also features a hidden passage to the pantry with an 80 cm wide door with a convenient opening system.

NEW IN 2024

Exceptional taste with remarkable shapes. A combination of beige and black peninsular cabinets that are glazed with filigree glass showcases separated by vertical wooden slats, adding elegance. A hidden right-hand section with a built-in bar that adds a touch of mystery to the room, a 40 mm worktop in natural quartzite, and top-quality Resopal Pro fronts.

A kitchen featuring a handleless GL system and a decorative wine cabinet equipped with a special fridge for the most demanding wine testers. The furniture reaches the ceiling. Hand-applied matte lacquers add to the unique look and originality of this Werk Mebel kitchen.

Inspired by the umami taste. Genuine solid wood on furniture fronts with decorative rustication. A kitchen island with a teppanyaki grill and gas and induction hobs. Decorative lamp style cooker hoods and a farmhouse ceramic sink. A true feast for the senses.

Elegant black combined with a natural granite worktop. Open shelving with a mirror adds space and light to the kitchen. Copper kitchen appliances, including cylinder island hoods with hand-applied copper flakes. A bar-style kitchen with matte lacquer fronts. Our black hat in the Werk Mebel family. A beautiful and timeless combination of copper and black. Highly recommended!

An industrial style for true connoisseurs of raw forms. The combination of a woodgrain front and matte black lacquer adds to the raw yet warm feel of the interior. Design with a separate coffee area.

NEW IN 2024

A new dimension of high fronts with vertically positioned handles. A table integrated into the island to create unity and coherence and open space with decorative shelves. Veneered fronts combined with acrylic glass are fascinating and give the kitchen an original character.

NEW IN 2024

This kitchen with hand-applied micro-cement fronts is a unique and inimitable design that enhances the aesthetic experience. It features a deeper worktop with 75 cm of usable space for more comfortable use and a mirror in the wall section that adds depth and space to the room. Special wall-mounted holders with dispensers for essentials such as salt, oatmeal, and sugar. An elegant and practical 'Back-Light' grip system.

A light and subtle kitchen with a cascading effect thanks to the use of full-depth, 60 cm units under the ceiling! The recessed cabinets in the main utility area offer more space and functionality and are finished in a woodgrain laminate to match the worktop and wall panels. The kitchen's character is further enhanced by the durable ceramic sinter, which imitates natural marble, and the modern, light shape of the double-sided island.

A kitchen design with a dining area and distinctive accents. The unique kitchen area with walnut veneer fronts combined with hand-applied graphite lacquer is perfectly complemented by the elegant GL handleless system in brushed gold. The dining area features roller shutter cabinets and hand-applied gold furniture fronts with a plaster texture. The rooms are separated by spatial shelves, which form a virtual wall between the rooms.

In the 'chillout' room, a subtle combination of usable space with decorative blue furniture. The matte lacquer is from the latest SIKKENS colour palette consisting of 5500 colours, which offers vast design possibilities. Each of our lacquers can be produced in a satin, gloss, or textured finish. Vast design possibilities are at your fingertips with Werk Mebel!

The details make the whole. Thanks to the latest technology, we can refine the smallest details to make the overall design stunning. One of the innovations we have introduced in our new product line is aluminium frames with an internal 'facet' cutter, along with the possibility of customising the colours of the glazing and fronts, as well as elegant internal backlighting in the form of vertical LED cutters with 'Emotion' lighting control technology - controlled by remote control or via a smartphone app, the intensity and hue of the light can be adjusted to suit the occasion or mood.

A bathroom designed by us, with a large mirror emphasising the spaciousness and openness of the room, along with worktop washbasins. The wall cabinets are recessed into the wall, making them functional and ergonomic. The wall cabinets are lacquered with a special impregnation of the base of the unit for high-quality use. There's no need to worry about the cabinet flooding.

A nautical-style bathroom with stylised fronts and blue wooden slats. To enhance the aesthetics, the mirrors have been backlit to add charm and ambience to the bathroom. Next to the bath is a usable unit with a shelf for towels.

High, full-extension drawers can accommodate and support up to 80 kg. Full extension and a lifetime guarantee for the system.

The interior of the drawer can be personalised at any time. Accessories in plastic, veneer, wood, or stainless steel are available.

The most necessary items are now at your fingertips in wooden drawers. We are proud to present our latest drawer with oak side and back panels.

A bread box with a perforated base for the optimal storage of bread and much more. The special material used guarantees that odours do not permeate and that no staining can occur.

NEW IN 2024

Open space wardrobe designed by us. German quality with Italian style. A perfectly designed wall unit with mirrored polymer glass fronts. Lighting recessed vertically in the inner side of the cabinet body, a skylight above the island, and a minimalist colour scheme to match the function of the room.

Convenient, functional, and adjustable shoe shelves with a special impregnated coating to ensure years of quality use. The inside of the door features additional accessory holders. Space dictated by functionality!

The interior of the island features pull-out systems with convenient drawers and built-in compartments for accessories such as ties, watches, and belts. We love such use of space!
